**Subject:** FYI -- URL referenced in OSC site profile for Gold King Mine Release says Page not found....

FYI --

I wanted to get this to someone who might be able to find the correct person to fix this....

The OSC site profile for the Gold King Mine Release Incident ([http://epaosc.org/site/site\\_profile.aspx?site\\_id=11082](http://epaosc.org/site/site_profile.aspx?site_id=11082)) indicates that the latest updates are available at <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response> (under 8/8/15 statement) but that URL returns a Page Not Found.

#### 8/8/15 STATEMENT

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the spill. EPA teams are deployed throughout the Animas River corridor collecting data.

EPA Region 8 is also in close coordination with Region 6 and Region 9 and the states of Colorado, New Mexico, Utah, Southern Ute Tribe and Navajo Nation.

EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Regular updates on the response for the public and the media are scheduled throughout the weekend. The latest updates and information on the response are available at: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>.

Returns file not found

Thanks.
